Frontend Developer with expertise in web design and coding. Can make websites look good and work well on computers and phones. Enjoys solving problems and working with others. Always learning about new web tools. Excited to help make great websites.

Skills

Programming Languages	HTML, Css, JavaScript
Tools and Platforms	Git, GitHub, VSCode
Frameworks and Libraries	ReactJs, Tailwind Css

Projects

Dice Roller Game
- Developed a dynamic Dice Roller app using **React**, and **TailWind Css**, blending the thrill of dice rolls with a visually stunning design.
- Implemented dynamically generated dice images for an extra layer of excitement.
- Ensured seamless responsiveness across devices; hosted the app on Netlify.

Foody zone
- Sleek Homepage: Crafted an aesthetically pleasing homepage using **React**, and **TailWind Css** for the Foody-zone project.
- Dynamic Data Fetching: Implemented dynamic data fetching from an API to add a lively touch to the content.
- Created a responsive design for a seamless user experience.

WeatherNow
- Developed a weather forecast web application using **HTML**, **CSS**, and **JavaScript**.
- Integrated a weather data API for real-time weather information.
- Created a responsive design for seamless user experience.
- Implemented geolocation support for local weather data.
